		5'4	163	24	80	not enough volume	
		5'6	168	25	90		
		5'8	173	26	110		

* based on intermediate riding skills; if you are advanced/pro you can choose 1 size smaller

** based on average water levels (m3/s) - for lower pressure it's more fun to ride the bigger size

*** for Plattling: we recommend 2 sizes smaller than indicated above (due to the wave shape with its very tight transition at lower water levels and enough pressure at higher levels)

User Info:

This River Boardfinder is based on hundreds of hours of experience from our network of team riders, partners and customers.

But as local conditions change and as new waves enter the rapid surfing community, it's under constant development.
